Cardiology

Shaping Cardiology Services with Accessibility and Compassion

Cardiac conditions complicate many of your patients' lives. Sometimes, patient education, lifestyle modifications and pharmaceutical interventions are just not enough. **When your patients need cardiac care, we're here to help.** We're shaping cardiology services in your community with compassion, accessibility and excellence.

Cardiac Care in Your Community

We all know the heart is vital to overall health, but maintaining cardiac wellness can be challenging. Our fast-paced lives make eating healthy, exercising and reducing stress complicated. Yet, as a medical provider, you understand how integral heart health is.

When heart problems **require more than diet modifications, exercise plans and medication therapy, you can count on us** for compassionate cardiac care. We provide a variety of interventional treatments and procedures.

Cardiac Catheterization and Vascular Lab

Our **cardiac catheterization lab offers stents and interventional peripheral procedures** to treat cardiac infarctions. Non-ST Elevated Myocardial Infarctions (Non-STEMI) often cause some degree of vascular blockage, reducing oxygen supply to the brain and body. Our cardiac cath lab specialists are here to help reduce adverse outcomes and improve the lives of the people in your community.

We also offer a **broad range of non-invasive vascular procedures and tests** to help you make informed decisions and personalized care plans. Some cardiac care procedures available in your community include:

- Echocardiograms
- Angiograms
- Cardioversions
- Peripheral arterial and carotid testing
- Stress testing

- Venous and arterial duplex ultrasound

Maintaining heart health requires ongoing attention and purpose-driven therapies. Supporting you and your patients is what we do. So, we are proud to provide inpatient and outpatient cardiac care and rehabilitation right around the corner.

Our Commitment to Excellence

Our facility and medical staff are dedicated to maintaining high standards of cardiac services. Specifically, we are committed to:

1. Maintaining current best practices.
2. Using appropriate surgical approaches.
3. Committing to the gold standard of post-procedural care.
4. Committing to improving patient outcomes.

Our cardiology team prioritizes patient-centered therapy and is dedicated to holistic, personalized interventions. Our facility and staff's **devotion to excellent, compassionate patient care is the foundation of our success.**

Your Cardiology Team

Our highly skilled, understanding cardiologists have training in a variety of cardiac care services that promote prevention, detection, treatment and recovery. We are dedicated to providing imaging, tests, and procedures that help you become maximally effective.

We understand how necessary collaboration and cath lab resources are for medical providers who are on the frontlines of patient care. Our medical staff will **work closely with you and your patient to create the best treatment plan** because we want to help you succeed and your patient get back to living life fully.

Ready to Get Started?

We understand the challenges and complexity of cardiac therapy. We're here to support you and your patients. From non-STEMI care to cardiac rehab and everything in between, we've got you covered.

As the referring physician, you seek to ensure that all your patients receive superior care. You need resources and referral options that you can be confident in. **Our proven service ensures your patients receive exceptional and compassionate cardiac care in their community.** Ready to get started? Click the "Refer" button.

Gastroenterology

Digestive Health Specialists: Providing Exceptional Gastroenterology Services

Digestive problems can be uncomfortable and embarrassing. No one wants to spend their days running back and forth to the bathroom. But all too often, digestive problems cause daily disruptions and discomfort.

We understand that your patients need compassionate, expert care for digestive issues. That's why our digestive health specialists work collaboratively with referring physicians. Together, we can offer gastroenterology services tailored to your patient's unique needs.

Digestive conditions we treat

With our gastroenterology services, we strive to help your patients **feel better and regain control over their health**.

We treat a wide range of gastrointestinal (GI) conditions, including:

- Acid reflux
- Constipation and diarrhea
- Hemorrhoids
- Ulcers
- Gastroesophageal reflux disease (GERD)
- Irritable bowel syndrome (IBS)
- Diverticulitis
- Crohn's disease
- Ulcerative colitis
- Celiac disease
- Liver and pancreatic disorders
- Gallbladder issues
- Colon polyps
- Colon cancer

Your patients should not have to endure the daily disruptions and discomfort of GI problems. As empathetic digestive health specialists, we're here to help.

Services and screening

When partnering with us, your patients can access a wide range of services and screenings. Our gastroenterology services include:

- Nutritional counseling for digestive health
- Advanced diagnostic imaging
- Colonoscopy and endoscopy procedures
- Management of chronic digestive diseases
- Treatment for swallowing disorders
- Screening for colorectal cancer

We **promote preventive screenings, early intervention and proactive treatment** to improve patient outcomes. You can rely on us to take good care of your patients.

Why choose us for gastroenterology services?

Our team of **digestive health specialists prioritizes clinical excellence and seamless collaboration**. Here's why so many physicians choose us for gastroenterology services:

- **Specialized expertise:** Our board-certified gastroenterologists and hepatologists provide cutting-edge diagnostic and treatment options.
- **Innovative technology:** We utilize advanced tools and evidence-based practices to promote patient outcomes.
- **Collaborative care:** We provide timely updates to referring physicians.
- **Multidisciplinary approach:** Our in-house specialists work cohesively, ensuring exceptional GI treatment and services.
- **Personalized treatment:** We treat your patients with respect, empathy and individualized care.

You can depend on us to deliver compassionate care and excellent gastroenterology services.

Your digestive health specialists

We are passionate about delivering the highest quality of care. Our team provides advanced diagnostics, personalized treatment and compassionate support. The gastroenterology team includes the following **board-certified specialists**:

1. Gastroenterologist
2. Hepatologist
3. Nutritionist
4. Psychologist

We work together to make your patient's life better. With access to various specialists, your patients receive individualized care from GI experts.

Digestive health with superior gastroenterology services

Our goal is to complement your exceptional care. Together, we can help patients spend less time in the bathroom and more time doing what they love. By providing compassionate gastroenterology services, we can improve the lives of patients.

Referring patients for GI services shouldn't be complex. That's why we commit to a smooth and efficient referral process. Whether delivering routine screenings or advanced treatment, we are your partner in care. For exceptional digestive care, click the "Refer" button.

Imaging

Quality Imaging Services That Are Accessible

Modern medicine depends on radiology and imaging services for establishing informed treatment plans. As a medical provider, you need resources that support your practice. Our facility provides **accurate, dependable and convenient imaging resources** for you and your patients.

Reliable Radiology Services

Radiology testing uses radiant energy to take pictures and visualize many body parts. Our radiologists use these tests to determine a diagnosis and evaluate treatment. Here are some of the tools and tests we use to help establish care plans for your patients.

Mammography

Mammography is an X-ray used to detect and diagnose breast concerns. With **equipment dedicated to these breast exams**, we provide high-quality, low-dose radiation to evaluate breast problems, such as a lump, pain or nipple drainage.

3D Mammography

We offer 3D mammography (or tomosynthesis) which is a clinically proven screening and diagnostic tool for early breast cancer detection. It uses advanced technology to take images of your breast from different angles and combine them to create a more complete and accurate image of your breast than is possible with regular 2D digital mammography.

Nuclear imaging

Nuclear imaging is **one of the least invasive and most detailed scans** for diagnosing and monitoring various treatments. This safe and effective testing utilizes a radioactive tracer for clear visualization. A medical professional typically administers the tracer intravenously.

Your patients may be concerned about the terminology “nuclear” or “radioactive,” but patients need to understand that this test is safe, effective and has no side effects. Additionally, the amount of radiation administered is minimal. Common conditions that can benefit from nuclear imaging are the following:

- Blood disorder
- Thyroid disease
- Heart disease
- Gallbladder disease
- Lung problems
- Bone issues
- Kidney disease
- Cancer

After the tracer collects in the tissue, a radiation detector produces digital signals, which are stored on a computer and can be generated to film. Our facility is committed to establishing a safe environment, and *our radiologists are available to answer any questions.*

CT scan

Computerized tomography, or CT scan, is a series of X-ray images that take pictures from different angles around the body. The cross-sectional images help our skilled radiologists visualize blood vessels, bones and other tissue. This **efficient and convenient test allows for quick examination**, especially when the patient is at risk of internal injury or trauma. CT scans help diagnose diseases and plan medical, surgical and radiation therapies.

MRI

Magnetic resonance imaging (MRI) uses magnets and radio waves, processed by computers, to generate images. This noninvasive test utilizes a large, tube-shaped magnet to create cross-sectional images of organs, tissue and the skeletal system. Our knowledgeable radiologists often use this **imaging tool for diseases that CT scans don't detect.**

We have wide-bore MRI which offers patients a larger, more open scanner compared to traditional MRI, which can be beneficial for patients who are claustrophobic, have larger body types, or need to be scanned in different positions.

Ultrasound

An ultrasound, or sonography, produces high-intensity sound waves to visualize structures within the body. This safe and effective test **does not use any radiation**.

We often think of ultrasound during prenatal care. Besides monitoring the uterus, ovaries, and embryos during pregnancy, this test can be used for many other reasons.

- Diagnose gallbladder disease
- Evaluate blood flow
- Guide needles for biopsy or treatment
- Visualize breast lump
- Examine thyroid gland
- Check genital or prostate problems
- Assess joint inflammation
- Determine bone disease

Our well-trained and personable sonographers understand how to manipulate this technology and can put your patients at ease.

X-ray

Our medical staff uses X-rays, or radiographs, for a wide range of injuries, diseases and disorders. Your patients can receive radiographs with or without contrast. Though this test uses a small amount of radiation, it is considered **safe for all ages, including babies**. However, pregnant women should avoid X-rays as they can harm the growing embryo.

Interventional Radiology

Interventional Radiology (IR) is a medical specialty that uses image guidance (like X-rays, CT scans, ultrasound, or MRI) to perform minimally invasive procedures for diagnosis and treatment of patients. Instead of traditional open surgery, interventional radiologists use small incisions and specialized instruments—often catheters, wires, and needles—to treat a wide range of conditions.

Meet Your Team

Radiology testing has become commonplace for medical professionals. We depend on detailed imaging to make informed diagnoses and treatment plans. However, our team understands that tests can cause fear and anxiety for your patients. That's why we're committed to listening and providing compassionate care.

Our radiology specialists provide a wide range of imaging procedures. We aim to deliver **detailed imaging** to your practice while providing your patient with a **kind and caring experience**. Our radiologists and technologists are truly extraordinary.

Quality and Convenient Imaging Services

We've got you covered, from ultrasound to nuclear imaging and everything in between. We understand the importance of **accurate, accessible and attentive radiology services**. Your patients and practice depend on it.

Our facility and staff strive to provide reliable radiology resources for you and your patients. Our quality radiology and imaging resources are accessible in your community.

Nephrology

Kidney Care: Supporting Patients with Advanced Nephrology Services

The kidneys' extensive filtration system is essential in maintaining health. Daily, the kidneys filter all of the body's blood, about 200 quarters.* These fist-sized organs tirelessly remove waste, regulate blood pressure and balance hormones. The renal system works hard to keep the body healthy and regulated. So, when kidney function falters, the whole body feels the effects.

We understand the challenges you face when managing patients with kidney conditions. We know advanced nephrology services are important to you and your patients. That's why we invest in innovative technology and experienced kidney specialists.

What kidney conditions do you specialize in?

Chronic kidney disease (CKD) impacts the lives of an estimated 35.5 million Americans.* Diabetes and high blood pressure are the leading causes of kidney failure. Our nephrology services address a variety of kidney-related conditions, including:

- Cystic kidney disease
- Diabetic kidney disease
- Hypertension
- Kidney stones
- Kidney infections or injury
- Urinary tract infections (UTIs)
- Nephrotic syndrome
- End-stage renal disease (ESRD)
- Hemolytic uremic syndrome
- Hyponatremia and other electrolyte disorders
- Toxic overdose
- Glomerulonephritis
- Polycystic kidney disease

A kidney condition doesn't just impact the renal system. The ripple effects are far-reaching. It can have serious implications for overall health and quality of life. That's why nephrology specialists embrace a holistic approach. Treating kidney problems means considering the whole person and addressing the broader impacts.

Why choose us for nephrology services?

From common conditions to complex issues, our nephrology team delivers personalized, expert care. Some benefits of partnering with us include:

- **State-of-the-art technology:** Advanced diagnostic and treatment tools ensure patients get the treatment needed.
- **Multidisciplinary team:** Our nephrology team collaborates to develop an individualized care plan.
- **Patient-centered:** Our holistic approach promotes kidney function and general health.
- **Expertise and compassion:** Knowledgeable and compassionate specialists improve the patient experience.
- **Streamlined referrals:** A simplified referral process ensures patients receive timely care without unnecessary delays.
- **Educational resources:** Clear, actionable information supports the treatment journey and empowers informed decision-making.

We strive to provide excellent nephrology care within our community. We are proud of the compassionate, expert care our nephrology team offers.

Your Provider Team

Tariq Abo-Kamil, MD

EMPLOYED PROVIDER

Nephrology

Louisburg, NC

Your nephrology team

Delivering holistic nephrology services is a team effort. The kidney team includes the following experts:

- Nephrologist
- Consulting physicians
- Specialized nurses
- Dietician
- Social workers

These nephrology specialists work together to provide advanced kidney care for your patients. They are **highly trained and dedicated individuals who deliver superior nephrology services**. Our team's unified approach ensures patients receive the expert care they need.

Confidently referring for nephrology services

As a general practitioner, your patients depend on you to guide them. They value your insights and expertise. So, you need easy-to-access nephrology services you can rely on. As *your partner in care*, we aim to support you as you support your patients.

We're proud of our advanced nephrology services and innovative technology. They are **invaluable resources for the patients in our community**. Click the 'Refer' button to begin the process. Together, we can enhance the lives of patients with kidney conditions.

Neurology

Neurology Services with Empathy, Innovation and Persistence

Neurological conditions take a toll on your patient's well-being. Strokes, headaches, seizures and other neurological illnesses can be debilitating — physically and emotionally. Utilizing innovation, persistence and experience, our neurologists and clinicians diagnose and treat diseases of the entire nervous system. With understanding and empathy, we help patients achieve their optimal neurological health.

Headache services

We all experience the occasional headache. But what happens when headaches become debilitating, causing significant personal loss? Headaches can rob people of hours and days.

Migraines, cluster headaches and tension headaches constitute the vast majority of primary headache disorders. Primary care providers (PCPs) can often diagnose and treat these conditions. But, if your patient's headaches persist, you need neurology services your team can count on.

Headaches can be the product of an underlying issue. That's why we commit to understanding the cause and treating the symptoms.

Stroke services

When your patient experiences a transient ischemic attack (TIA) or stroke, the sudden loss of control is frightening. Stroke is the primary cause of disability in the United States, causing incalculable personal costs. **We have assembled the team and treatments your patients need for optimal recovery.** We are proud to offer stroke prevention and efficient interventions close to home.

Seizure services

Seizures cause unusual movements, odd behaviors, and decreased levels of consciousness. Like strokes, these brain disturbances evoke startling emotions in patients, friends and family. Our facility is here to help **reduce epileptic episodes and determine the root cause.**

Other neurology services

The nervous system is extensive, impacting all other body systems. Additionally, many neurological conditions are tricky to diagnose. Our facility invests in **cutting-edge technology to help expedite diagnosis and improve outcomes.**

Some other neurology conditions we treat are the following:

- Cerebral palsy
- Parkinson's disease
- Multiple sclerosis
- Peripheral neuropathies
- Movement and gait conditions
- Sleep disturbances

Whatever the diagnosis, our team seeks to help patients achieve optimal vigor.

Your neurology team

The field of neurology is ever-changing and evolving. You need access to neurologists who are eager to learn and adapt to current research and innovative treatments. Despite the complexity of neurological conditions, **our team consists of lead learners.** We are individuals inclined to advance the field and improve outcomes.

Why choose us?

Delivering excellent neurology services with empathy, innovation and persistence is what we do. Your patients know their bodies the best. They know when things are off. That's why all our visits begin with active listening.

Additionally, we are committed to collaboration. As the physician on the front lines, you need neurology services that value your insights. Consultation with in-house specialists is also vital. This **teamwork ensures your patients receive timely results and answers.**

Partnering to reach optimal neurological health

Neurological symptoms can evoke strong emotions in patients. PCPs provide invaluable resources as patients explore concerns and ask many questions. We are here to help answer those questions and investigate the root causes of neurological problems.

We are here to expedite diagnosis and improve outcomes. Why? Because we understand that each person has unique needs and personal concerns. We aim to help every patient achieve optimal neurological health.

Ready to partner with a team dedicated to excellence and empathy? Click the “Refer” button to get started.

Oncology

Compassionate Care for Cancer Patients

Few words are more difficult to say than “You have cancer.” We understand the extensive impact these words have on your patient’s life. **Cancer changes everything.** That’s why we commit to delivering preventive testing and a high standard of oncology services.

Cancer Care That’s Close to Home

Home — patients going through cancer treatments often long for home. They yearn to sleep in their own beds and enjoy the comfort of friends, family and pets. Spending weeks or months away from home adds stress to an already stressful situation. That’s why our facility strives to **provide a variety of oncology services that are close to home.**

Outstanding Oncology Services

Family physicians, PAs and NPs are at the frontlines in the fight against cancer. Often, these vital medical professionals are the first to observe abnormalities and recommend testing. They **ensure patients receive the right care at the right time.** So, our facility offers a variety of testing and treatment options for your oncology patients.

Diagnostic services

- Mammography
- MRI
- CT scan
- PET scan

Oncology treatment

- Surgery
- Chemotherapy
- Radiation
- Radiofrequency ablation

Our staff are here to support you so that you can support your patients. Our screening guidelines, diagnostic scans and oncology services enable **early detection and treatment, promoting better outcomes.**

Healthy Person Program

Not only do we deliver testing and treatment options, but we also offer ongoing support for you and your patients.

Our facility has partnered with the Eon Centralized Management team to deliver the Healthy Person Program.

Utilizing AI technology and a multidisciplinary approach, the team **tracks incidental findings.** This resource helps us *promote early detection, diagnosis and intervention.* Our Healthy Person Program reports abnormal results that could lead to cancer in the following areas:

- Lung
- Pancreas
- Thyroid
- Breast

After reviewing scans and images, the team notifies the patient and PCP about incidental findings while keeping everyone updated on changes. Using this program, we provide recommendations and support while allowing you, the provider, to determine the care plan.

Meet Your Oncology Team

Because cancer is traumatic, our oncology team provides compassionate, individualized care. With **warmth, dignity and a profoundly relational approach,** our staff provides the care your patients deserve.

Our cancer specialists are trained in treating various cancers with exceptional therapies and up-to-date protocols. We aim to compassionately support patients in their fight against cancer.

Uniting to Provide Compassionate Care for Cancer Patients

From testing to treatment, our staff helps manage cancer care. We holistically support oncology patients with **preventive services, diverse therapies, on-site social services and financial counselors**. Building on your established patient relationship and our outstanding oncology services, we can unite to provide excellent cancer care in our community.

Cancer is stressful. With compassion at our core, we are here to help reduce stress and improve outcomes. Striving to cater to your patients' concerns, our staff seeks to be an invaluable resource for you and your patients.

As the referring physician, you seek to ensure that all your patients receive superior care. You need resources and referral options that you can be confident in. **Our proven service ensures your patients receive exceptional and compassionate oncology care in their community.** Ready to get started? Click the "Refer" button.

Orthopedics

Innovation, Safety and Better Results in Orthopedics

"Nothing seems to be helping." You hear it daily. Knee and hip pain can keep your patient from living their best life. But who can you trust to perform the much-needed surgery? We have invested in **image-guided robotic technology and the training to safely perform minimally invasive techniques** so your patients receive exceptional surgical care.

The Robotic Advantage

Robotic surgeries are producing superior results. However, you understand that proper training is essential for these innovative techniques. Without skilled surgeons, image-guided robotics can do more harm than good. As an informed and compassionate doctor, you want the best for your patients.

With robotic technologies, surgeons can make smaller incisions since they don't need room for bulky equipment and manual manipulation. These surgical innovations come with superior imaging, allowing for clear visualization. These features are especially beneficial during spine and joint surgeries.

The advantage of using image-guided robotics for surgical procedures is *directly related to the smaller incision size and reduced internal injury*. Here are some of the benefits:

- Less bone and soft tissue damage
- Less postoperative pain
- Less need for narcotics
- Less blood loss
- Less scarring

After much research and consideration, we recognized that robotics provide a significant benefit to our patients. Striving for excellence in all we do, our facility has invested in the resources to offer minimally invasive surgeries utilizing robotic technology.

But we didn't stop there. **Our surgeons are highly trained to use image-guided robotics, producing better results for your patients.**

Orthopedic Services Available Near You

Our skilled orthopedics and spine team remain focused on your patient's needs, conditions and injuries. We are committed to developing a course of treatment to lessen pain, correct or reduce symptoms, and speed recovery. Our hospital offers a wide variety of orthopedic services, so your patients receive the right treatment at the right time in their community.

Surgical options

- Arthroscopy
- Hand surgery
- Joint replacement surgery
- Partial knee replacement
- Robotic-assisted hip and knee replacement surgery
- Spine surgery

Non-surgical options

- Pain management
- Diagnostic testing
- Imaging resources

Meet Your Orthopedic Team

We partner with exceptional medical staff to bring you and your patients a wide range of interdisciplinary orthopedic services – allowing your patients to access local, highly qualified orthopedic surgeons trained in image-guided robotics.

We have gone above and beyond to advance our capabilities, technologies and services so your patients remain safe, active and enjoying life.

Providing Quality Orthopedic Care

Image-guided robotics are no longer something of dreams. These technologies have become a reality and are shaping modern medicine, allowing for *more accessible procedures, faster recoveries and reduced patient harm*.

With highly trained surgeons, we want to partner with you to provide excellent care, resulting in elevated patient satisfaction. **As the referring physician, you hold the key that unlocks the door to better procedural outcomes.** We are privileged to partner with you to provide safe, quality care to your orthopedic patients.

Surgery

Boldly Transforming Surgical Care

No one excitedly anticipates surgery day. Yet, sometimes, surgical interventions are the best option. With image-guided robotics, patients often experience better outcomes with quicker recovery times. With a drive to improve surgical care, our facility has invested in these technologies.

What Is Image-Guided Robotics?

Image-guided robotics are **sophisticated technologies that use real-time imaging obtained from small cameras to aid in minimally invasive procedures**. Surgical interventions have become common, with almost 50 million surgeries performed annually in the United States. However, less invasive techniques are becoming the gold standard.

Using magnetic resonance and ultrasound pictures, medical staff access vivid visualization of the targeted site. Additionally, tiny tools, guided by a skilled surgeon, allow for superior surgical repairs with less internal trauma. The combination of detailed imaging and small devices enables surgeons to extend their capabilities and successfully perform minimally invasive procedures.

Robotic Surgical Services

Many medical conditions require minor surgeries, which are available as outpatient procedures. Other surgeries require a hospital stay. Regardless of surgery type, we're here to help.

Our surgeons can access the da Vinci Surgical System to perform many of these procedures. This robotic surgical innovation supports our medical staff with **detailed imaging and precise dexterity**, making entry to targeted sites easier.

Benefits of Robotic Surgical Systems

Our facility uses robotic surgical systems to perform minimally invasive techniques. Image-guided robotic technology allows surgeons to *conduct complex, delicate procedures with unmatched precision and reduced internal*

injury. Patients and providers rave about the benefits of this robotic innovation.

- **Smaller incisions** lead to *less scarring and infection*.
- **Reduced internal damage** leads to *less pain and blood loss*.
- **Faster mobilization** leads to *shorter recovery times*.

With our surgeon's hands at the helm, we often observe the advantages of image-guided robotics. However, as with all medical procedures, results vary.

Achieving Better Outcomes

Our hospital equips highly trained surgeons with the technology and tools to perform traditional, laparoscopic and robotic procedures. When surgery is necessary, we aim to **support patient recovery with exceptional education, reliable resources and proven protocols**.

We utilize the Enhanced Recovery After Surgery (ERAS) protocol, a multimodal approach to post-surgical pain management. This evidence-based guideline helps decrease postprocedural pain, promote mobilization and reduce narcotic use.

Meet Your Surgical Team

Committing to patient-centric interventions, our surgeons aim for successful and safe procedures. We are **committed to excellence, innovation, and, most importantly, superior patient care**. Not only do our surgeons have access to modern innovations, but our surgical team also has the training required to utilize image-guided robotics.

Progressive Technology and Positive Results

No surgery is routine — at least not to your patient. We understand that. Our full range of surgical options delivers the proper treatment for each patient.

With our eyes on excellence, we strive to demonstrate this drive with **progressive technology and positive patient outcomes**. However, our tools, technology and training are only possible with your collaboration.

Contact us today to learn how we can *work together to transform surgical care*. Referring your patient to our surgical services is easy.

Urology

Urology Services with Excellence and Dignity

Patients often feel uncomfortable talking about incontinence or erectile dysfunction. Consequently, they avoid much-needed treatment because of embarrassment. Your patients need urology services with dignity. We commit to delivering excellent urology services with compassion, discretion and sensitivity.

Exceptional Urology Services

When you partner with us, you get **exceptional urology services and a multi-disciplinary team**. Our urologists specialize in diagnosing and treating urinary tract conditions and male reproductive problems. Some urology conditions our team treats include:

- Urinary incontinence
- Overactive bladder
- Urinary tract infections (UTIs)
- Kidney stones
- Benign prostate hyperplasia (BPH)
- Erectile dysfunction
- Hematuria
- Urologic cancers, including prostate, bladder, kidney and testicular cancers

We are passionate about collaboration because a team approach produces superior results. That's why we take a multi-disciplinary approach to all our urology services. Regardless of diagnosis, we coordinate care with you, the oncologist, the cardiologist, or other providers to ensure exceptional care for your patients.

Your Urology Team

As a conscientious provider, you need urology resources you can count on. Our premier urologists excel in diagnosing and treating urinary tract and male reproductive conditions. Our physicians focus on personalized interventions while working collaboratively to produce excellent results.

We are passionate about creating a patient-first environment. That's why we prioritize listening to understand. We want to understand the problem and how the condition affects your patient's life. **With a holistic mindset, our urologists treat not only the problem but the person.**

Louisburg, NC

Why Choose Us?

We prioritize patient-centered care. Your patients need a urology team **committed to listening, learning and leading them to a better life without so many genitourinary interruptions.** That's why we advance our techniques while focusing on person-first communication and care.

Your patients are tired of endless bathroom breaks and subpar sexual health. We are here to help preserve their dignity and way of life.

Providing Advanced Urology Services in Your Neighborhood

Many people feel embarrassed to talk about problems they experience in the bathroom and bed. That's why so many postpone treatment. With **empathy at our core, we aim to listen, understand and respond to concerns with dignity and discretion.**

From curing urinary conditions to restoring sexual health, our superior urology team strives to improve your patient's life by addressing annoying genitourinary conditions. Contact us to learn how we can bring excellent urology services to your patients. Click the "Refer" button to get started today.

Women's Health

Women's Health for All Stages

Pregnancy, hormonal changes and menopause – your patients experience many changes throughout womanhood. We're here to deliver personalized care for all these changes, ages and stages.

Convenient and Compassionate Care

With the demands of work, caregiving and family schedules, **your patients are busy**. They need healthcare services that are compassionate AND convenient.

Additionally, many women's health concerns can be personal and private. That's why we aim to treat each woman with individualized consideration and dignity while providing excellent care and support.

Women's Health Services

Whether 25 or 65, we understand that your patient's overall health is vital to them living their best life. We offer women's health services that facilitate **wellness throughout all the stages of womanhood**.

Breast health

By offering **mammograms, breast ultrasounds and biopsies**, we aim to detect abnormalities early and improve outcomes. We approach breast health with sensitivity, so every appointment and procedure is *as comfortable and convenient as possible for your patients*.

Gynecology

Whether your patient needs testing or treatment, we're here to help. Our gynecologic specialists provide compassionate care for a wide range of pelvic disorders. With modern technology and skilled staff, we strive to reduce the stress of women's health concerns.

Minimally invasive surgeries

Surgical techniques and technology have come a long way. With laparoscopic and robotic capabilities, we provide **women's health procedures that often result in less scarring and quicker recovery times.**

Prenatal care

Pregnancy is a life-altering experience. With knowledgeable and caring staff, we are here to support your OB/GYN patients as they prepare for birth and motherhood. Additionally, our OB/GYN specialists are equipped and ready to help with high-risk pregnancies.

Labor and delivery

Every mother has their own unique birth story. With experienced staff, comforting amenities and innovative resources, *we aim to make that story pleasantly memorable.* Our nurses and providers promote safe deliveries, healthy babies and supported moms.

Postpartum care

The days directly after labor can be exhausting and intimidating. We understand how vital those few days in the hospital can be for parental success. Patient education and support promote healthy moms and babies. You can rest assured that we are there to oversee safe recovery, teach infant care, and support mother-baby bonding.

Robotics in Women's Health

Sometimes, surgical intervention is the best course of action for your patient. Using image-guided robotic technology, **women often benefit from minimally invasive surgery.** Using tiny tools and detailed imaging, surgeons can perform many procedures that often produce the following benefits:

- Reduced scarring
- Reduced soft tissue damage
- Reduced pain and need for narcotics
- Reduced blood loss
- Reduce hospitalization time

We offer minimally invasive options for many women's health procedures. Our robotic technology helps surgeons enhance their capabilities by improving visualization and dexterity.

Meet Your OB/GYN Specialists

Our OB/GYN specialists understand that women's health preferences are unique. Each woman **deserves care personalized to their individual needs**. That's what makes our women's health services so exceptional.
