Cardiology

Shaping Cardiology Services with Accessibility and Compassion

Cardiac conditions complicate many of your patients' lives. Sometimes, patient education, lifestyle modifications and pharmaceutical interventions are just not enough. **When your patients need cardiac care, we're here to help.** We're shaping cardiology services in your community with compassion, accessibility and excellence.

Cardiac Care in Your Community

We all know the heart is vital to overall health, but maintaining cardiac wellness can be challenging. Our fast-paced lives make eating healthy, exercising and reducing stress complicated. Yet, as a medical provider, you understand how integral heart health is.

When heart problems **require more than diet modifications, exercise plans and medication therapy, you can count on us** for compassionate cardiac care. We provide a variety of interventional treatments and procedures.

- Arterial Blood Gas
 - Cardiac Event Monitors
 - * Cardiac Rehab
 - EKGs
 - Holter Monitors
 - Methacholine Challenge Testing (Specialized PFT to aid asthma diagnosis)
 - Pulmonary Function Testing (PFT)
 - 24-hour/Overnight Pulse Oximetry
 - Echo Cardiograph
 - Cardioversion
 - TEE

Cardiac Catheterization and Vascular Lab

Our **cardiac catheterization lab offers stents and interventional peripheral procedures** to treat cardiac infarctions.

Non-ST Elevated Myocardial Infarctions (Non-STEMI) often cause some degree of vascular blockage, reducing oxygen supply to the brain and body. Our cardiac cath lab specialists are here to help reduce adverse outcomes and improve the lives of the people in your community.

We also offer a **broad range of non-invasive vascular procedures and tests** to help you make informed decisions and personalized care plans. Some cardiac care procedures available in your community include:

- Echocardiograms
- Angiograms
- Cardioversions
- Peripheral arterial and carotid testing
- Stress testing
- Thoracic echocardiography (TTE) imaging

Maintaining heart health requires ongoing attention and purpose-driven therapies. Supporting you and your patients is what we do. So, we are proud to provide inpatient and outpatient cardiac care and rehabilitation right around the corner.

Our Commitment to Excellence

Our facility and medical staff are dedicated to maintaining high standards of cardiac services. Specifically, we are committed to:

1. Maintaining current best practices.
2. Using appropriate surgical approaches.
3. Committing to the gold standard of post-procedural care.
4. Committing to improving patient outcomes.

Our cardiology team prioritizes patient-centered therapy and is dedicated to holistic, personalized interventions. Our facility and staff's **devotion to excellent, compassionate patient care is the foundation of our success.**

Your Cardiology Team

Our highly skilled, understanding cardiologists have training in a variety of cardiac care services that promote prevention, detection, treatment and recovery. We are dedicated to providing imaging, tests, and procedures that help you become maximally effective.

We understand how necessary collaboration and cath lab resources are for medical providers who are on the frontlines of patient care. Our medical staff will **work closely with you and your patient to create the best treatment plan** because we want to help you succeed and your patient get back to living life fully.

Imaging

Quality Imaging Services That Are Accessible

Modern medicine depends on radiology and imaging services for establishing informed treatment plans. As a medical provider, you need resources that support your practice. Our facility provides **accurate, dependable and convenient imaging resources** for you and your patients.

Reliable diagnostic imaging services

Radiology testing uses radiant energy to take pictures and visualize many body parts. Our radiologists use these tests to determine a diagnosis and evaluate treatment. Here are some of the tools and tests we use to help establish care plans for your patients:

- 3D Mammography
- Cardiac Imaging
- Computed Tomography (CT)
- Fluoroscopy
- Low-dose CT Lung Cancer Screening
- Magnetic Resonance Imaging (MRI)
- Breast MRI
- Nuclear medicine
- PET Scan
- Ultrasound
- X-ray
- Interventional Radiology

Mammography

Mammography is an X-ray used to detect and diagnose breast concerns. With **equipment dedicated to these breast exams**, we provide high-quality, low-dose radiation to evaluate breast problems, such as a lump, pain or nipple drainage.

Nuclear imaging

Nuclear imaging is **one of the least invasive and most detailed scans** for diagnosing and monitoring various treatments. This safe and effective testing utilizes a radioactive tracer for clear visualization. A medical professional typically administers the tracer intravenously.

Your patients may be concerned about the terminology “nuclear” or “radioactive,” but patients need to understand that this test is safe, effective and has no side effects. Additionally, the amount of radiation administered is minimal. Common conditions that can benefit from nuclear imaging are the following:

- Blood disorder
- Thyroid disease
- Heart disease
- Gallbladder disease
- Lung problems
- Bone issues
- Kidney disease
- Cancer

After the tracer collects in the tissue, a radiation detector produces digital signals, which are stored on a computer and can be generated to film. Our facility is committed to establishing a safe environment, and *our radiologists are available to answer any questions.*

CT scan

Computerized tomography, or CT scan, is a series of X-ray images that take pictures from different angles around the body. The cross-sectional images help our skilled radiologists visualize blood vessels, bones and other tissue. This **efficient and convenient test allows for quick examination**, especially when the patient is at risk of internal injury or trauma. CT scans help diagnose diseases and plan medical, surgical and radiation therapies.

MRI

Magnetic resonance imaging (MRI) uses magnets and radio waves, processed by computers, to generate images. This noninvasive test utilizes a large, tube-shaped magnet to create cross-sectional images of organs, tissue and the skeletal system. Our knowledgeable radiologists often use this **imaging tool for diseases that CT scans don't detect.**

Ultrasound

An ultrasound, or sonography, produces high-intensity sound waves to visualize structures within the body. This safe and effective test **does not use any radiation**.

We often think of ultrasound during prenatal care. Besides monitoring the uterus, ovaries, and embryos during pregnancy, this test can be used for many other reasons.

- Diagnose gallbladder disease
- Evaluate blood flow
- Guide needles for biopsy or treatment
- Visualize breast lump
- Examine thyroid gland
- Check genital or prostate problems
- Assess joint inflammation
- Determine bone disease

Our well-trained and personable sonographers understand how to manipulate this technology and can put your patients at ease.

X-ray

Our medical staff uses X-rays, or radiographs, for a wide range of injuries, diseases and disorders. Your patients can receive radiographs with or without contrast. Though this test uses a small amount of radiation, it is considered **safe for all ages, including babies**. However, pregnant women should avoid X-rays as they can harm the growing embryo.

Meet Your Team

Radiology testing has become commonplace for medical professionals. We depend on detailed imaging to make informed diagnoses and treatment plans. However, our team understands that tests can cause fear and anxiety for your patients. That's why we're committed to listening and providing compassionate care.

Our radiology specialists provide a wide range of imaging procedures. We aim to deliver **detailed imaging** to your practice while providing your patient with a **kind and caring experience**. Our radiologists and technologists are truly extraordinary.

Neurology

Neurology Services with Empathy, Innovation and Persistence

Neurological conditions take a toll on your patient's well-being. Strokes, headaches, seizures and other neurological illnesses can be debilitating — physically and emotionally. Utilizing innovation, persistence and experience, our neurologists and clinicians diagnose and treat diseases of the entire nervous system. With understanding and empathy, we help patients achieve their optimal neurological health.

Headache services

We all experience the occasional headache. But what happens when headaches become debilitating, causing significant personal loss? Headaches can rob people of hours and days.

Migraines, cluster headaches and tension headaches constitute the vast majority of primary headache disorders. Primary care providers (PCPs) can often diagnose and treat these conditions. But, if your patient's headaches persist, you need neurology services your team can count on.

Headaches can be the product of an underlying issue. That's why we commit to understanding the cause and treating the symptoms.

Stroke services

When your patient experiences a transient ischemic attack (TIA) or stroke, the sudden loss of control is frightening. Stroke is the primary cause of disability in the United States, causing incalculable personal costs. **We have assembled the team and treatments your patients need for optimal recovery.** We are proud to offer stroke prevention and efficient interventions close to home.

Seizure services

Seizures cause unusual movements, odd behaviors, and decreased levels of consciousness. Like strokes, these brain disturbances evoke startling emotions in patients, friends and family. Our facility is here to help **reduce epileptic episodes and determine the root cause.**

Other neurology services

The nervous system is extensive, impacting all other body systems. Additionally, many neurological conditions are tricky to diagnose. Our facility invests in **cutting-edge technology to help expedite diagnosis and improve outcomes.**

Some other neurology conditions we treat are the following:

- Cerebral palsy
- Parkinson's disease
- Multiple sclerosis
- Peripheral neuropathies
- Movement and gait conditions
- Sleep disturbances

Whatever the diagnosis, our team seeks to help patients achieve optimal vigor.

Your neurology team

The field of neurology is ever-changing and evolving. You need access to neurologists who are eager to learn and adapt to current research and innovative treatments. Despite the complexity of neurological conditions, **our team consists of lead learners.** We are individuals inclined to advance the field and improve outcomes.

Why choose us?

Delivering excellent neurology services with empathy, innovation and persistence is what we do. Your patients know their bodies the best. They know when things are off. That's why all our visits begin with active listening.

Additionally, we are committed to collaboration. As the physician on the front lines, you need neurology services that value your insights. Consultation with in-house specialists is also vital. This **teamwork ensures your patients receive timely results and answers.**

Partnering to reach optimal neurological health

Neurological symptoms can evoke strong emotions in patients. PCPs provide invaluable resources as patients explore concerns and ask many questions. We are here to help answer those questions and investigate the root causes of neurological problems.

We are here to expedite diagnosis and improve outcomes. Why? Because we understand that each person has unique needs and personal concerns. We aim to help every patient achieve optimal neurological health.

Ready to partner with a team dedicated to excellence and empathy? Click the “Refer” button to get started.

Orthopedics

Enhancing Lives with Accessible Orthopedic Services

Joint pain can keep your patient from living their best life. But who can you trust for accessible orthopedic services? Our facility offers a variety of orthopedic services to promote prevention, detection, treatment and rehabilitation in an environment of compassion.

Neck and Back Pain

Back and neck pain **affects more than 80% of adults** at some point in their life. With a column of 33 vertebrae, the spine, which extends from the skull to the pelvis, is often the culprit of debilitating pain.

When evaluating therapy options for the spine, your patient may feel some anxiety. Thankfully, many spine conditions do not require surgical interventions. Our orthopedic specialists are committed to providing pain management and treatment interventions tailored to meet your patient's unique needs. We aim to empower individuals with the tools and resources that promote an active lifestyle.

Joint Pain

Knee injuries and hip pain are common reasons people visit an orthopedic surgeon. Before establishing a plan of care, our orthopedic experts will perform a thorough assessment and any necessary diagnostic tests. After diagnosis, our specialists will discuss treatment options.

Committed to safety and long-term mobility, our providers choose non-surgical therapies whenever possible. Yet, we are certified to perform surgical interventions when necessary.

We offer surgical options for several joint repairs or replacements if non-invasive interventions prove ineffective. Our orthopedic surgeons may recommend surgical treatment if the following conditions apply:

- Joint pain that continues despite compliance with non-surgical therapies
- Loss of significant range of motion
- Joint discomfort during times of rest

- Decreased ability to perform daily or athletic activities

Regardless of treatment modality, we deliver thorough education so patients are informed and on board with the recommended treatment plan.

Hand and Wrist Pain

Hobbies, like gardening or sports, enhance our lives. The effects of a hand or wrist injury can be far-reaching, preventing your patients from doing their favorite activities and limiting athletic performances. Since these common injuries can lead to forearm and elbow pain, our orthopedic specialists are ready and available to treat your patient's hand or wrist injury.

As with all our orthopedic services, we begin with a complete evaluation of the injury and testing that ensures proper diagnosis. Whether or not surgical intervention is necessary, your patients will receive **treatments precisely designed to help them get back to what they love.**

Orthopedic Services Available Near You

Our skilled orthopedics and spine team remain focused on your patient's needs, conditions, and injuries. We are committed to developing a course of treatment to **lessen pain, correct or reduce symptoms, and speed recovery.**

Our hospital offers various orthopedic services, so your patients receive the right treatment at the right time in their community.

Interventional orthopedic services

- Hand and upper extremity services
- Spine and neck services
- Joint replacement surgery
- Partial hip and knee replacement
- Total hip and knee replacement
- Sports medicine

Supportive orthopedic services

- Pain management
- Diagnostic testing
- Imaging resources

- Rehabilitation

Meet Your Orthopedic Team

We work with exceptional orthopedic specialists and an experienced spine team to bring you and your patients a wide range of **interdisciplinary orthopedic services**. That's why your patients can access highly qualified orthopedic specialists and surgeons right in their community.

Providing Quality Orthopedic Care

We are passionate and dedicated to providing quality orthopedic services just down the street. As the referring physician, **you hold the key that unlocks the door to better procedural outcomes**. Our staff understands that you want excellent orthopedic care for your patients. We take our partnerships seriously and are privileged to collaborate with you to provide safe, quality orthopedic care. Referring your patient is easy. Click the "Refer" link to get started.

Rehabilitation Services

Enhancing Patient Lives with Comprehensive Outpatient Rehabilitation Therapy

We offer comprehensive outpatient rehabilitation therapy for adults across our facilities. With an experienced staff including Physical Therapists, Occupational Therapists and Speech Language Pathologists, we are ready to help patients get back to their active lives.

Our highly skilled and knowledgeable therapy practitioners specialize in improving the abilities and lives of those affected by injuries, disease, illness, pain, and developmental delays.

Physical Therapy

With our state-of-the-art exercise and rehabilitation equipment, we are able to provide physical therapy services to individuals who have sustained injuries or have limitation in their functional status due to disease, injury or illness. We pride ourselves on providing one-on-one care for each patient by licensed therapists only. We strive to create personalized treatment programs to regain skills and achieve the best possible outcome for a good quality of life.

Conditions that we treat include, but are not limited to:

- Arthritis
- Difficulty in activities of daily living (ADLs)
- Falls
- Generalized weakness
- Lower extremity amputations
- Neck/back pain
- Neurological impairments
- Orthopedic pain/ injures
- Parkinson's disease
- Sports injuries
- Vertigo

Speech Therapy

If your patient suffers from a speech or language problem, it may be hard for them to communicate, participate in daily activities or enjoy their time with others. Highpoint Health Therapy Services located at Highpoint Health – Sumner Station, offers outpatient speech therapy for a variety of patient populations. Speech therapy is the assessment, diagnosis and treatment of speech, language, cognitive communication, voice and swallowing disorders by a speech-language pathologist, so that your patient can achieve a higher level of verbal expression, comprehension and swallowing safety. We are here to help your patients get back to their active lives.

Conditions that may warrant an evaluation:

- Stroke
- Brain mass
- TBI
- Dementia or Alzheimer's disease
- ALS and MS
- Parkinson's disease
- Huntington's disease
- Head and neck cancer

Ready to Get Started?

As a referring provider, you are an important member of your patient's therapy services team. Upon referral, your patient meets with our staff for a consultation. Our team then develops a treatment plan for your patients and informs you throughout the process. For more, information, click 'Refer Now' for our updated contact information.

Surgery

Boldly Transforming Surgical Care

No one excitedly anticipates surgery day. Yet, sometimes, surgical interventions are the best option. We understand the risks and reservations often associated with surgical procedures, which is why our teams work closely with patients, families, and their primary care doctors to ensure that we answer every question and address every concern through their care journey.

Why Choose General Surgery?

The decision to undergo any surgery, let alone general surgery, is a big one. General surgery as a specialty encompasses a wide variety of procedures, many of which occur in the abdomen. Our surgical team coordinates the care and management of each patient every step of the way through screening, surveillance, surgical intervention, rehabilitation, and follow-up care.

Key conditions general surgeons treat include:

- Traumatic injuries
- Physical abnormalities
- Breast cancer
- Conditions involving the upper GI tract (esophagus, stomach and small intestine).
- Conditions involving the biliary tract (gallbladder, bile ducts, pancreas and liver).
- Endocrine conditions (involving the thyroid or adrenal glands).
- Vascular conditions
- Critical illness and terminal illness

Benefits of General Surgery

- **Tailored Treatment Approach:** Our surgeons make every decision in real time, adapting to your specific anatomy and situation.
- **Unmatched Dexterity:** Years of honing their craft give our surgeons unparalleled flexibility and control over instruments.
- **Personalized Care:** We build relationships with our patients, ensuring you feel informed and supported throughout your journey.

- **Proven Results:** We boast a track record of success with a wide range of procedures, using minimally invasive techniques whenever possible.

With our surgeon's hands at the helm, our patients can rest assured knowing they will always receive the highest quality care. However, as with all medical procedures, results vary.

Achieving Better Outcomes

Our team of seasoned surgeons and dedicated healthcare professionals bring more than just expertise to the operating room. We bring compassion, understanding, and a commitment to each patient's unique needs. When surgery is necessary, we aim to **support patient recovery with exceptional education, reliable resources and proven protocols.**

We utilize the Enhanced Recovery After Surgery (ERAS) protocol, a multimodal approach to post-surgical pain management. This evidence-based guideline helps decrease postprocedural pain, promote mobilization and reduce narcotic use.

Meet Your Surgical Team

Committing to patient-centric interventions, our surgeons aim for successful and safe procedures. We are **committed to excellence, innovation, and, most importantly, superior patient care.**

Progressive Technology and Positive Results

No surgery is routine — at least not to your patient. We understand that. Our full range of surgical options delivers the proper treatment for each patient.

With our eyes on excellence, we strive to demonstrate this drive with **proven expertise and positive patient outcomes**. However, our tools and training are only possible with your collaboration.

Contact us today to learn how we can *work together to transform surgical care*. Referring your patient to our surgical services is easy.

Urology

Urology Services with Excellence and Dignity

Patients often feel uncomfortable talking about incontinence or erectile dysfunction. Consequently, they avoid much-needed treatment because of embarrassment. Your patients need urology services with dignity. We commit to delivering excellent urology services with compassion, discretion and sensitivity.

Exceptional Urology Services

When you partner with us, you get **exceptional urology services and a multi-disciplinary team**. Our urologists specialize in diagnosing and treating urinary tract conditions and male reproductive problems. Some urology conditions our team treats include:

- Urinary incontinence
- Overactive bladder
- Urinary tract infections (UTIs)
- Kidney stones
- Benign prostate hyperplasia (BPH)
- Erectile dysfunction
- Hematuria
- Urologic cancers, including prostate, bladder, kidney and testicular cancers

We are passionate about collaboration because a team approach produces superior results. That's why we take a multi-disciplinary approach to all our urology services. Regardless of diagnosis, we coordinate care with you, the oncologist, the cardiologist, or other providers to ensure exceptional care for your patients.

Improving Results with Innovation

More than 50% of men experience benign prostatic hyperplasia (BPH) after the age of 60. For decades, surgeons have used transurethral resection of the prostate (TURP) to treat BPH. However, Aquablation is an innovative, minimally invasive technique that uses robotic technologies to treat BPH. Some of the benefits of using Aquablation include:

- Protection of male anatomy
- Conservation of sexual function
- Less resection and procedural time
- High safety ratings
- No need for ionizing radiation
- No thermal damage

Aquablation produces comparable results to TURP with less irreversible complications, like incontinence, erectile dysfunction and ejaculatory ineptitude. **Men often prefer Aquablation because of the improved net benefits.** Our facility is proud to deliver this sought-after surgery to your male patients.

Why Choose Us?

We prioritize patient-centered care. Your patients need a urology team **committed to listening, learning and leading them to a better life without so many genitourinary interruptions.** That's why we advance our techniques while focusing on person-first communication and care.

Your patients are tired of endless bathroom breaks and subpar sexual health. We are here to help preserve their dignity and way of life.

Providing Advanced Urology Services in Your Neighborhood

Many people feel embarrassed to talk about problems they experience in the bathroom and bed. That's why so many postpone treatment. With **empathy at our core, we aim to listen, understand and respond to concerns with dignity and discretion.**

From curing urinary conditions to restoring sexual health, our superior urology team strives to improve your patient's life by addressing annoying genitourinary conditions. Contact us to learn how we can bring excellent urology services to your patients. Click the "Refer" button to get started today.

Women's Health

Women's Health for All Stages

Pregnancy, hormonal changes and menopause – your patients experience many changes throughout womanhood. We're here to deliver personalized care for all these changes, ages and stages.

Convenient and Compassionate Care

With the demands of work, caregiving and family schedules, **your patients are busy**. They need healthcare services that are compassionate AND convenient.

Additionally, many women's health concerns can be personal and private. That's why we aim to treat each woman with individualized consideration and dignity while providing excellent care and support.

Women's Health Services

Whether 25 or 65, we understand that your patient's overall health is vital to them living their best life. We offer women's health services that facilitate **wellness throughout all the stages of womanhood**.

Breast health

By offering **mammograms, breast ultrasounds and biopsies**, we aim to detect abnormalities early and improve outcomes. We approach breast health with sensitivity, so every appointment and procedure is *as comfortable and convenient as possible for your patients*.

Gynecology

Whether your patient needs testing or treatment, we're here to help. Our gynecologic specialists provide compassionate care for a wide range of pelvic disorders. With modern technology and skilled staff, we strive to reduce the stress of women's health concerns.

Minimally invasive surgeries

Surgical techniques and technology have come a long way. With laparoscopic and robotic capabilities, we provide **women's health procedures that often result in less scarring and quicker recovery times.**

Prenatal care

Pregnancy is a life-altering experience. With knowledgeable and caring staff, we are here to support your OB/GYN patients as they prepare for birth and motherhood. Additionally, our OB/GYN specialists are equipped and ready to help with high-risk pregnancies.

Labor and delivery

Every mother has their own unique birth story. With experienced staff, comforting amenities and innovative resources, *we aim to make that story pleasantly memorable.* Our nurses and providers promote safe deliveries, healthy babies and supported moms.

Postpartum care

The days directly after labor can be exhausting and intimidating. We understand how vital those few days in the hospital can be for parental success. Patient education and support promote healthy moms and babies. You can rest assured that we are there to oversee safe recovery, teach infant care, and support mother-baby bonding.

Robotics in Women's Health

Sometimes, surgical intervention is the best course of action for your patient. Using image-guided robotic technology, **women often benefit from minimally invasive surgery.** Using tiny tools and detailed imaging, surgeons can perform many procedures that often produce the following benefits:

- Reduced scarring
- Reduced soft tissue damage
- Reduced pain and need for narcotics
- Reduced blood loss
- Reduce hospitalization time

We offer minimally invasive options for many women's health procedures. Our robotic technology helps surgeons enhance their capabilities by improving visualization and dexterity.

Meet Your OB/GYN Specialists

Our OB/GYN specialists understand that women's health preferences are unique. Each woman **deserves care personalized to their individual needs**. That's what makes our women's health services so exceptional.

Promoting Exceptional Women's Health

Women's health and OB/GYN facilities treat various medical conditions. That's why we deliver a wide range of services to match your patient's needs. Our OB/GYN specialists are experienced and highly skilled. With a **welcoming environment, convenient services and comforting care**, we gladly serve the women in our community.

We would be honored to partner with you in providing excellent, convenient and comforting care for your female patients.

Wound Care

Advanced, Evidence-Based Wound Management

Our comprehensive approach to wound management utilizes the latest clinical tools and traditional clinical practices. Your patient's individualized treatment plan may include specialized wound dressings, debridement, compression therapy, hyperbaric oxygen therapy, prescription growth factors, advanced cellular products, edema management and non-invasive vascular assessment.

Wound Management Care

Your patient's individualized treatment plan may include specialized wound dressings, debridement, compression therapy, hyperbaric oxygen therapy, prescription growth factors, advanced cellular products, edema management and non-invasive vascular assessment.

Hyperbaric Oxygen Therapy

Hyperbaric oxygen therapy (HBOT) helps the body's oxygen-dependent, wound-healing mechanisms function more efficiently. While enclosed in a clear, large chamber, patients breathe pure oxygen, saturating their blood plasma and allowing it to carry from 15 to 20 times the normal amount of oxygen to the body's tissues. These treatments are provided by physicians who are specialty-trained in hyperbaric medicine as well as our highly trained clinical hyperbaric technicians and staff.

Approved Indications for Hyperbaric Oxygen Therapy

- Diabetic wound of the lower extremities
- Soft tissue necrosis and osteoradionecrosis
- Chronic refractory osteomyelitis
- Compromised skin grafts and flaps
- Actinomycosis
- Crush injury/acute traumatic peripheral ischemia
- Progressive necrotizing infections (necrotizing fasciitis)

Who may benefit from our specialized services?

If your patient's wound isn't healing, they may benefit from the proven, best-practice methodologies at the Wound Care Center. Some of the indications for wound therapy include:

- Diabetic ulcers
 - Neuropathic ulcers
 - Pressure ulcers
 - Ischemic ulcers
- Venous insufficiency
- Traumatic wounds
- Surgical wounds
- Vasculitis
- Burns
- Peristomal skin irritations
- Other chronic, non-healing wounds
